EXPRESS CHART NOTE (MEDICAL APP)

SUMMARY:

A user will register as a 7 day free trial .

In a trial version he can only add one report if he tries to add one more report it will going to be replaced by the last added report after showing a message.

After 7 days he's trial will be ended and he cannot be able to perform any operation in the application except purchasing the subscription plans using stripe.

After purchasing any one of the subscription plan he can now create 10 reports not more than 10 if he tries to create more one report it will be replaced by the last added report after showing a message.

If it purchases a monthly or yearly subscription .So the subscription will expire after the duration e.g: one month/one Year.But the reports remain save but he cannot perform any operation.

If it purchases a group plan he can add more users to his plan by sharing his 8-digit code to the users but the limited number of users can join the group plan according to the group perk.

User can only login from one device only. If he tries to login from other device a popup will show to logout from that device if clicked yes so he can login and will logout from the other device.

REGISTER:

Added a popup message which shows user will register as a 7 day trial

WIZARD:

Added six static examinations in one line in every system.
Also added numeric values along with static examinations.
BMI will calculate automatically after providing height and weight.

FAQS:

Now only Admin can perform CRUD operations in FAQs section.
The delete functionality is not working before but now it is working properly.

Contact Us:

Applied validations on contact form.
Now contact email is going from a noreply@expresschartnote.com.
Also changed the title of email to Thank you for contacting express chart note.

Report:

Added a dropdown for filtering emails on top right corner above the table.
Admin can see the all reports of all users.
Admin can also see the reports of specific users by filtering them through email

Subscription:

ADMIN CASE:
Added a fully operational CRUD operation for PERKS.
Admin can change the price of both plans.
Admin can also the number of users of group plan.

One Device Login Functionality:

User can now only login from one device .
If user is already logged in from another device and tried to login from another device also
a popup will show up:
                   "That user is already logged in want to logout etc."
if the user click on continue he will logout from the other device and will log in from the current device.

Payment Gateway:

Using stripe as a payment gateway integration.

Subscription Plans:

Created two subscriptions plans

        Single User Subscription Plan:(Monthly/Yearly)
        Multiple User Subscription Plan:(Monthly/Yearly)

Admin scenario:
    Admin has the access to change the both subscription plans: For example

Admin can change the price of both
Admin can change the perks of both
Admin can change the number of users of group subscription plan

Single User Subscription Plan:(Monthly/Yearly)

User can only add 10 reports
If tries to add more than 10 reports the 11th report will replaced by the last added report after showing a popup message.

Duration:

If the user purchases the monthly plan, it will expire after one month but the reports of the user will still exists.

Same goes for the yearly plan. Will expire after one year.

Multiple User Subscription Plan:(Monthly/Yearly)

User can only add 10 reports
If tries to add more than 10 reports the 11th report will replaced by the last added report after showing a popup message.

A user who purchases the group plan will get a 8-Digit Code
He can share it with the users who he wants to join his group plan
only limited number of users can join the plan according to the plan restriction

Duration:

If the user purchases the monthly plan, it will expire after one month but the reports of the user will still exists.

Same goes for the yearly plan. Will expire after one year.
